

2511 : Bending Pliers

Description

For hardened and annealed copper pipes: Ø 6 to 18 mm and Ø 1/4" to 5/8" O.D. / wall thickness 1 to 1.2 mm.

Bending radius: 2 to 3.5 D.

For forming very short radius bends and counter-bends.

Bending angle: up to 180°.

0 to 180° graduations.

Steel handle and body. Machined groove.
