

Overview

FX-VV800

FX-VV Permanent Lifting Magnets for beams and profiles

Product number 11010804

Description

FX-VV is the lifting magnet for profiles and hot components.

The long, narrow design is conceived to pick up beams and profiles, also on the inner web of the beam, and reach their maximum holding force even with comparatively thin material thickness, so that even thin sheets can be lifted safely. Thanks to the 90° double prism, angle profiles can now be picked up on the inside and outside, or components can be turned.

Steel fabricators rely on FX-VV.

Product information

Diameter round:	Ø 35-75 mm
Dimensions (mm):	352x112x115
Flat material:	6mm
Product:	FX-VV
Temperature (°C):	150
max. load flat (kg):	800
max. load from flat material:	20mm
max. load round (kg):	300
max. Traglast Profil 90° innen:	300 kg
max. Traglast Profil 90° außen:	400 kg
