

The remote control (RC) allows you to organize a welding station at a distance of 20 meters, adjust the current value without leaving the welding site. The RC is compatible with manual arc welding machines MMA 315 G, MMA 400 G and MMA 500 G. The device increases the efficiency of welding and ensures ease of use.

The scales on the remote control are conventional units. When connecting the RC to the welding machine, it is necessary to remember that the adjustment of the parameters occurs in the range of minimum and maximum currents of the welding inverter.

|---|--------------------|
| Connection to the device: | 4pin |
| Length of the remote control with cable, m: | 20 |
| Suitable for devices: | MMA 315G/400G/500G |
| Net weight, kg (not more): | 1.96 |
| Dimensions of the remote control, mm: | 260*260*55 |
| Gross weight, kg (not more): | 4,16 |
| Dimensions of individual packaging, mm: | 400*295*80 |
