

Spark protection cover made of E-glass fabric with Alufix coating on one side

Product code:
S1352030

Spark protection cover protects against easily flammable or sensitive objects from flying sparks, welding spatters and beads and thus reduce the fire risk.

Toxicological safety is a matter of course.

- mechanical resistant
- non-slip, flexible
- weight: approx. 650g/m²
- dimensions approx. 2000 x 3000 mm

- Available in other dimensions
- Available in other materials
